

## **Bayphase issue 11<sup>th</sup> Edition of the Iraq Strategic Report**

18<sup>th</sup> August 2017

International Oil and Gas Consultancy Bayphase Ltd. have issued the 11<sup>th</sup> Edition of its Iraq Strategic Report. The report provides the most extensive, detailed and up-to-date review of the Upstream, Midstream and Downstream activities in Iraq and the Kurdistan Region ever produced. The report also supplies information on development and operation costing, power generation, transport and export infrastructure in Iraq.

“Iraq is the fourth largest producing country in the world, but still remains under-invested in terms of infrastructure and field development potential. The recently announced licensing round for nine blocks in Iraq -“The Fifth Round”- has re-focused minds on the immense potential of Iraq’s hydrocarbon industry” says Bayphase Ltd. Managing Director Geoff Eyre. “What we have designed here is the first port of call for E&P teams and investors around the world looking to develop their interests in rapidly recovering Iraq”.

Middle-East watchers have noted that the security situation in Iraq has improved greatly over the course of the year-to-date, culminating in the expulsion of ISIS from Mosul. The economic situation also has shown strong positive gains with a growth rate of 11% posted for 2016.

“The 11<sup>th</sup> edition of the Iraq Strategic Report represents a significant upgrade in comparison to previous editions”, says Mr. Eyre. “We are happy to report that our field database has increased to 127 Iraqi fields, and the report has been extended to over 900 pages. Quite simply, for investors and exploration professionals, this is the most convenient way to gather all your Oil Industry information on Iraq”.
